Crafted Timber

Ribbedvud is a fluted solid wood collection by Solivud, featuring a series of precision-crafted profiles designed for modern interiors.

Each volume presents a curated set of patterns, offering versatility across applications and spaces.

CRAFTED FROM NATURE

Ribbed**Vud**
VOL.1

Rooted in the integrity of natural timber, each fluted design is shaped to retain the character of the wood it comes from. The grain is not applied, but revealed—carrying subtle variations that make every surface distinct. Through considered craftsmanship, raw material is translated into architectural form without losing its origin.

Designed for spaces that value material honesty, these profiles bring depth, rhythm, and warmth into contemporary environments. The interplay of light and shadow across each contour enhances spatial experience, while the authenticity of real wood ensures a presence that ages with time, not against it.

DIFFERENT WOOD SPECIES. ONE DESIGN LANGUAGE

Our collection is built using four original timber variants, each carrying a distinct shade profile. This ensures every product holds genuine depth, variation, and the unmistakable presence of real wood.
